WORK EXPERIENCE

Unigo

Mobile Developer

Startup | Sept 2025 – Feb 2026

- Worked as a Flutter developer at a startup building a carpooling application.
- Integrated Firebase services (Firebase Auth, Firestore, Firebase Storage).
- Collaborated with project managers and developers on technical decisions.
- Handled application security: code obfuscation, Firebase security rules, and App Check.
- Implemented state management using Bloc and built part of the interface.
- Managed code integration and versioning.

Djezzy

Internship

Algiers (on site) | June – July 2025

- Explored Djezzy's IT department across Big Data, web development, mobile development, AI, and data analysis.
- Gained insight into how large companies structure and manage their work and the diverse applications of computer science in the job market.
- Learned from senior developers and built Flutter side projects under their supervision.

PROJECTS

ESI Archive Digitization

Project Leader (6-person team) — Grade: 16.7

ESI, Algiers | Feb 2026 – June 2026

- Built a Python/OpenCV pipeline for scanned document processing and data extraction.
- Designed a Flutter desktop app with a SQLite database to manage 2,177+ digitized student records.
- Implemented search, statistics, and automated PDF/CSV export (transcripts, certificates, rankings).

Creators Area

Freelance Developer

France (Remote) | Aug 2022 – May 2025

- Delivered custom Discord bots, apps, and automation scripts for an international client base using Flutter and Python.

EXTRACURRICULAR ACTIVITIES

- Student Delegate
- Member of the CSE student club since 2024
- Participated in multiple hackathons and events (Hackin, DevSprint, Global Africa Tech)
